• FIRE SAFETY SIGNAGE • FIRE BLANKETS • ENVIRONMENTAL SAFE DISPOSAL

FIRE RISK ASSESSMENT.

What you need to know.

Your duties

Responsibility for complying with the Fire (Scotland) Act 2005 and the associated Fire Safety (Scotland) Regulations 2006 rests with the Duty Holder.

In a workplace, this could be the employer as well as any other person who may have control to any extent of any part of the premises, for example, the occupier or owner. Employees have a duty to cooperate with employers to ensure the safety of others from fire.

If you are the Duty Holder, you must carry out a fire risk assessment of the premises, which must focus on the safety of all 'relevant persons' in case of fire.

Your fire risk assessment will help you identify risks that can be removed or reduced and to decide the nature and extent of the general fire precautions you need to take to protect people against the fire risks that remain. If you employ five or more people, you must record the significant findings of your risk assessment.

A management commitment to fire safety is essential to assist with achieving suitable fire safety standards in premises and to maintain a staff culture of fire safety.

It is a management responsibility to have both an emergency fire action plan and arrangements to implement the plan. A written emergency fire action plan should be kept on the premises, be available to and known by staff, and form the basis of the training and instruction, which is provided to all staff. This plan should be available for inspection by the enforcing authority.

With this in mind, CSS Ltd, like to ensure our customers are kept up to date with Life Safety Solutions we can offer to assist them in doing so.

There are many things to consider when it comes to Fire safety, two of which to consider, are noted below:-

Fire Alarm Systems.

Emergency Lighting Systems.

Are your systems Compliant and Fit for Purpose? Are you aware of current British Standards?

If your answer is simply not sure or no, CSS Ltd can help.

CSS Ltd can Consult with you, Design, Supply, Install and Commission the above systems using the latest technology on the market.
